The Facts of the Telephone Situation in Tennessee

By J. EPPS BROWN, President
CUMBERLAND TELEPHONE & TELEGRAPH COMPANY
(Incorporated)

This Company's capital stock was issued for the full equivalent of its par value in cash or property, being without what is commonly called "water." In spite of this fact the company has not earned its 6 per cent dividend in full since the year 1917, except during the year in which it was guaranteed and paid by the Federal Government, and it was not earned from the operation of the property in that period.

The deficits in dividend earnings for the last three years have been respectively:

1918	-----	\$ 187,515.00
1919	-----	416,687.00
1920	-----	699,609.00

Total deficit three years ----- \$1,303,811.00

Payment of the dividend was continued during these three years in the hope of better earnings and in order to maintain the company's financial position, with the result that the previously accumulated surplus of the company has been substantially wiped out. After forty years of business, the remaining surplus is only \$294,647.00.

The company was unable to pay, and did not pay any dividend for the first quarter of 1921. The total deficit in interest and 6 per cent dividend requirements for the first three months of 1921 were \$283,084.00, or at the rate of \$1,132,336.00 per annum, which is 60 per cent more than in 1920.

The result of the company's operations in Tennessee is worse, because now and for many years past the earnings in Tennessee have been less proportionately upon the value of the property than for the company as a whole.

The company has already secured the approval of increased rates by the Public Service Commission of other states in which it operates and is asking for similar increases in rates in Tennessee.

In the presentation of the case we will submit full and complete information in all detail, verifying the statements made in these advertisements and supporting and justifying the increases asked for.

\$83,000,000 WAITING FOR OWNERS TO GET IT

Washington, May 16.—U.S. Sam has \$83,000,000 of some people's money waiting in the Treasury for them to come and get it, according to the latest official figures of the outstanding temporary Liberty Bonds.

This sum represents the interest due holders of temporary Liberty Bonds who have not exchanged their bonds for permanent coupon bearing securities on which the regular interest is paid.

The figures show that there are 7,471,171 separate temporary bonds of various denominations, amounting to \$1,132,730,200 still in the hands of owners who have not exchanged them for coupon bonds.

Against these figures on the Treasurer's books stands \$83,165,867 interest money that owners of bonds have not claimed.

Liberty Bonds from which all coupons have been clipped, or on which all coupons are due, should be exchanged for bonds with coupons attached running for life of bond. If you have bonds which should be exchanged, just bring them to us and we will attend to the matter for you.

This is just another service that we are glad to do for our patrons.
